PROFILE

Computer Science major with a minor in Cybersecurity at Fordham University, pursuing opportunities in software development and security. Skilled in applying software programming skills to real-world challenges, with hands-on experience in data-driven projects, web development, and cybersecurity concepts.

EDUCATION

Fordham University **Expected Graduation Date: May 2026**

Bronx, New York: Bachelor of Science in **Computer Science**, Minor in **Cybersecurity**

Relevant Coursework: Data Structures, Computer Algorithms, Data Communications & Networks, Machine Learning/Data Mining

CERTIFICATIONS

Google Cloud Cybersecurity Certificate – Google Cloud:

Completed hands-on training in cloud security, threat analysis, and defense strategies, culminating in a capstone project demonstrating applied best practices.

CodePath (CYB 101) Intro to Cybersecurity:

Completed 10-week CodePath course in cybersecurity. Covered foundational concepts and best practices performed labs on Virtual Machine and concluded the course working with peers on a presentation about solving common issues in cybersecurity.

PROJECTS

Full-Stack Portfolio Website (Python Flask):

Designed, developed, and deployed a dynamic multi-page website using **Flask, SQLite,** and **HTML/CSS/JS**. Implemented core web functionality, including secure user authentication (with password hashing) and AJAX-driven comments for dynamic content updates.

Club1886 (Arsenal FC Historical Archive & Analytics Platform)

Built a full-stack web application serving as a comprehensive historical database and real-time analytics platform for Arsenal FC, covering 30+ years of match data. Engineered a multi-source data pipeline integrating web-scraped data, REST APIs, and static datasets, with automatic fallback mechanisms ensuring 99%+ data availability. Implemented real-time match tracking via API integration, AI-powered natural language querying using **Gemini**, and interactive data visualizations. Tech stack includes **React 18, TypeScript, Tailwind CSS, Supabase Edge Functions, and Python** scraping infrastructure.

PROFESSIONAL EXPERIENCE

Stop & Shop – Online Pickup Associate & Cashier | *July 2023 – Present*

- Provided responsive customer support for cashier and online order transactions, demonstrating quick, creative, and thoughtful decision-making.
- Engaged directly with customers to ensure satisfaction and collaborated with team members to support efficient store operations.

SKILLS

Languages: C++, Python, JavaScript, HTML/CSS, Assembly

Frameworks/Tools: Flask, Git, SQL, Linux,

Other: Customer Service, Teamwork, Problem-Solving, Communication

AI & Automation: Claude Code (agentic coding), LLM tool-use/function-calling, Gemini API, prompt engineering, AI-assisted development workflows
